

THE GATE CLOSER SPECIALISTS

Lion Pedestrian Gate Closer

In the Lion pedestrian gate closer, you have one closer which provides hydraulically controlled, automatic gate closing for many types of pedestrian gates. Suited for installation with both in-line (90° opening) and offset hinged (180° opening) gates, you only have to check the gate and post specification to be sure the Lion pedestrian gate closer is the one for the job.

A Lion pedestrian gate closer is an ideal closer for many applications. Here are a few: factories, car parks, schools, swimming pools, apartment blocks, housing and marinas. Of course, there are many others too. The Lion gate closer gives you automatic closing at a controlled adjustable speed with independent control of final latching speed. And you are also providing your customer with a compact and unobtrusive gate closing solution.

With production testing of each gate closer batch to 500,000 cycles, you can be sure this gate closer will last. Also, choosing a Lion you can be confident that your customer will be free from concerns about corrosion as the closer body is made from aluminium with a powder coated paint finish and the arm and rail are stainless steel.

Like all Locinox products, the Lion has been designed to give you easy and quick installation. Each closer includes two rails so you can install the closer to both in-line or offset hinged gates. With self-adhesive templates to show you where each hole is to be drilled, installation is simple.

If you would like help with anything to do with this product, our telephone number and email address are at the bottom of this page.

Key features:

90° opening with in-line hinges

180° opening with offset hinges

Gates up to 1.1 m wide x 1.8 m high x 75 kg

Fully functional down to -30° C

40 mm box section or larger posts

30 mm box section or larger gate frames

Installs left or right opening

Separate closing & latching speed adjustments

Production testing for 500,000 cycles

Easy install with Quick-Fix threaded inserts
