

THE GATE CLOSER SPECIALISTS

Locinox N-Line Concealed double mag-Lock system

Designed with security and user safety in mind, the N-LINE MAG system has no projections to collide with when walking between gate posts, particularly where two electromagnets are fitted (top and bottom).

Rounded edges on the profile, electromagnets and handles give protection from injury, easy opening and unrestricted passage.

N-LINE MAG is the ideal system for schools, care homes, factories and any situation where an electromagnet protruding into the pedestrian walk through space could cause injury.

Key features:

2000 mm profile length

Profile can be cut to length

Supplied with caps & joints for two magnets

Two electromagnets included

Double sided handle included

Can be wired with 12V DC or 24V DC options

460 mA (12V) or 230 mA (24V) current demand

Quick fix fasteners and profile screws included

Made from salt spray tested quality materials

For when pedestrian safety is paramount
