

# THE GATE CLOSER SPECIALISTS

## Magna Latch Side Pull Gate Latch

The Magna Latch Side Pull model is an inexpensive, general-purpose, magnetic gate latch that offers simple effective latching for flush gates and posts whether in the home, garden or factory environment.

With a new and sleek design, it offers horizontal and vertical adjustment of up to 5/16" (8mm) for quick installation. The generous adjustment extends gate life by allowing the latch to be adjusted should the gate sag or the ground to move and take place over time.

The Magna Latch Side Pull model is also available with a Glass Hardware kit, designed to fit glass pool gates and 50mm (2") round posts. Please call for details.
